

Prague forests - introduction

The largest and the most visited forests are the following:

- **Klánovice Forest** (approx. 1,000 hectares on the Prague territory)
- **Kunřatic and Michle Forest** (approx. 300 hectares)
- **Wild Šárka Valley – Nebužice** (360 hectares)
- **Modřany Gorge** (290 hectares)
- **Chuchle Grove** (134 hectares)
- **Xaverov Grove** (104 hectares)
- **Ďáblice Grove** (57 hectares)
- **The Game Preserve Hvězda** (approx. 85 hectares, out of that approx. 78 hectares of forest stand) is considered not merely a forest, yet, most of all, the national cultural monument (NCM).

The rest of the total area is scattered among tens of smaller forests and woods.
